

The Intelligencer

Office, Nos. 35 and 37 Fourteenth Street.

FROMMAN is a shrewd advertiser. His next official act should be to get his messenger murdered, and then have him restored to life.

Nothing could be more gratifying than the response to the hard work of the Committee on Trades Display. Earnest application and intelligent direction are going to give us something worth coming a good many miles to see.

WHEELING is being recognized as a reunion city. Next year the Sons of Veterans are to be with us, a national patriotic organization of high motive and growing strength. Let us come. We'll try to make it pleasant for them.

On the Market street bridge the Gas Trustees have an opportunity at slight cost to add to the attractiveness of the illumination, and at the same time to add to the safety of those who pass over the bridge. A line of pipe the length of the bridge on each side, would be a public benefit. Do we hear the Trustees?

So far as it is possible to prevent it, there should not be a dark corner anywhere in Wheeling during the Reunion nights. We have the city gas, the natural gas and the electric light, to say nothing of an abundance of illuminating oil. With all these the city should be bright and cheerful every night. That will be very discouraging to the toughs who may come here to work schemes under cover of the darkness.

By Monday night all the decorations should be in place. By that time the work of the Decoration Committee will be finished, and business houses and private residences should be in the same attractive condition. Fine effects can be produced with little expense, and where several neighbors join an attractive array can be thrown across a street at moderate cost. Let everybody do his best, and the combined efforts will be surprising.

Chicago did so well with the County Commissioners that she is encouraged to try her luck on the City Fathers. There have been hints of a coming storm in that latitude, and now it seems to be fairly on. Yerkes, who turns up as the paymaster for the street railway corporation, served a term in the Eastern penitentiary of Pennsylvania for his part in a job by which the treasury of Philadelphia was plundered of about \$300,000.

Yerkes was the City Treasurer's friend and banker, and it was always thought that he was the more culpable of the two. In fact he seemed to have been the Dan of a Philadelphia Scott-Dunn combination. He went to Chicago after his liberation and went deep into street railways there, not long since, his Philadelphia record was raked up. It may be that Jolt will supplant Cherry Hill in the case of Mr. Yerkes.

Stick the Intelligencer began to pound away at the pottery industry, three pottery enterprises have been set going, and it will not be long before three new concerns will be making ware. The West Virginia China Company, whose formation is just announced, opens upon a field almost unoccupied in America.

The country imports largely the grade of ware which this company is to make, and it can be made in America as well as anywhere in the world. More than this, it can be made in Wheeling to better advantage than elsewhere in America. This fact is recognized by practical men who have thoroughly investigated the subject. Wheeling's facilities for transportation carry her products to every market. Her natural gas supplies at reasonable rates the pottery's ideal fuel.

Under competent management, as the West Virginia Pottery is to have, a dozen potteries can be pushed to success in Wheeling. With the impetus this industry already has in this city, it is not unreasonable to look for still other enterprises in the area before our city shall be much older.

Wheeling is not so much in the town lot business as some other places, but when activity and growth are being talked about, Wheeling can take a place very near the head of the table.

Quadrant's Fourth Ball.

Special Dispatch to the Intelligencer. PARKERSBURG, W. Va., August 19.—John Doty, the young man from Pennsylvania who assaulted George Deems yesterday with a hammer, was held to-day in the sum of \$1,000 to answer an indictment. Not being able to furnish the bond he was sent to jail.

AN UNFORTUNATE REUNION.

Soldiers Survived the War to Meet Death in a Sham Battle.

ESPIRITO, Ill., August 19.—Two terrible accidents occurred here this morning at the Reunion of the Eighty-seventh Illinois Veterans. During the sham battle a cannon was prematurely discharged, blowing off James Cramer's right arm. An instant later, a few rods distant, another cannon discharged and stretched five victims on the ground. One Sullivan had both arms blown off, and will probably die. The other injured were Robert Johnson, Irwin Reeder, William Daniels and Emanuel Berry. They are fearfully lacerated and burned, but will recover.

Balloon Boxes Destroyed.

ASTORIA, Tex., August 19.—In the United States Court Wednesday, in the Washington county election case, seventeen witnesses testified for the State. The testimony, while conflicting in many ways, is emphatic in showing that ballot boxes were destroyed by armed, masked men. These distributing or voting the Republican tickets were threatened with violence. The defendants have not yet positively been identified. Alibi have been partly proven for some of the defendants.

Opposed to the Third Party.

ATLANTA, Ga., August 19.—The Farmers' Convention, yesterday, after listening to a doleful account of the Texas Farmers' Alliance in favor of a third political party, passed a resolution, thinking the speaker, not determined that in their opinion no third party was necessary.

THE BIG REUNION

A BLAZE OF LIGHT AND GLORY

To Make the Nail City Shine Next Week till Her Reunion Can Be Seen in Three States—Progress of the Arrangements For Entertaining the Crowd.

EVER in her whole history, probably, certainly not since the ever-to-be-remembered Sanitary Fair, has Wheeling experienced such a stirring up as she has undergone in the past week. Everybody in the city next week, has applied to the Committee on Public Comfort for a number of cots, intending to improve a lodging house. This little poster illustration of the city's condition has been inspired in the people. A gentleman from a neighboring town who was here yesterday, said the crowd was going to be larger than Wheeling can care for. He based his opinion on his own knowledge of the crowd coming from Eastern Ohio. He said there never was any occasion when one-fifth of the crowd which will be here next week was attracted to the Nail City. The same proposition will hold good, from all reports, in all the surrounding country in August, but there is no danger that the city cannot take care of all the people who come. If the high water mark of 100,000 is reached nobody need go hungry nor sleep on the street. There will be ample accommodations for all.

THE DECORATIONS.

Judging from the number of people to be seen going along the streets carrying bundles of flags and other decorations, the town will be covered with the national tricolor next week. The two upright posts for the main arch on Market street just above Twelfth were placed in position yesterday, and the work of erecting the arch would have been begun last night had not the weather forced this work to be done to-day. This arch is a magnificent affair, and will be brilliantly lighted with the incandescent electric light. The gas arch on Main street near Tenth was erected yesterday. It has a continuous line of gas globe, and in the arch is a monogram of the letters U. S. formed of tiny gas jets.

THE TRADING DISPLAY.

At a meeting of the Trades Display Committee last evening, the marshals and assistants were detailed to the three divisions of the market. The two upright posts for the main arch on Market street just above Twelfth were placed in position yesterday, and the work of erecting the arch would have been begun last night had not the weather forced this work to be done to-day. STEAMER BURNED

FOUR HUNDRED MILES FROM LAND

Thirteen Persons Lost—The Steamship City of Montreal, of the Inman Line—The Passengers and Crew—A Half Million Dollars Lost.

LONDON, August 19.—The Inman Line steamer City of Montreal has been destroyed by fire at sea. Thirteen lives are reported lost. The City of Montreal left New York August 6 for Liverpool. She was commanded by Captain Land.

The news of the burning was learned upon the arrival at Queenstown this morning of the British steamer York City, Captain Benn, which left Baltimore August 14 for London. This steamer rescued the passengers and crew from the burning vessel and brought them to Queenstown.

It is learned that thirteen persons perished. The destruction occurred on the night of the 10th inst. Five days after she left New York. A boat containing six passengers and seven members of the crew is missing. The occupants of this boat are being searched for.

The passengers and crew were taken off the York City by the tug Mount Etna and landed at Queenstown. All were accounted for except the thirteen persons in the missing boat. It is learned that shortly after the passengers had gone to bed on the night of the 10th inst. the ship being in latitude 43 north at the time, they were aroused by an alarm of fire.

A scene of consternation ensued and the passengers were greatly terrified when they found out the true state of affairs. The smoke caused by the fire was suffocating. The passengers dressed and got on deck as quickly as possible, and with but little appearance of panic.

In the main hold, situated in the water, were some working on the flames and the vessel was shaped toward Newfoundland, 400 miles distant. The flames spread with great rapidity, and the heat became so intense that the passengers were unable to remain on the ship.

It is becoming evident that it was impossible to save the ship, a momentary panic ensued, when the captain decided to abandon the vessel. All managed to embark in the boats, all of which, but containing six of the crew and seven passengers, were picked up by the New York City.

The City of Montreal had a miscellaneous cargo, including two hundred tons of cotton, and the agents of the line are of the opinion that the fire originated there. The vessel was commanded by Captain Francis Land, and had a crew of eight hundred men, and a large number of passengers, but had no first-class passengers, but had a large number of intermediate and fifty steerage passengers.

After everybody on the ill-fated steamship City of Montreal had embarked in the ship's boats, the boats soon scattered. The boat which contained the captain and seven passengers, and two steamers, was the only one which was not picked up. The boat did not contain a full crew, and the captain's orders as to the use of the lifeboats were not followed.

THE TROUBLE AT AN END

In Morgantown—The Wrath of the Hotters Against the Wheeling Law.

MORGANTOWN, August 19.—The labor trouble here has all quieted. The men received assurances to-day that they should all be paid and all riotous demonstrations have ceased. The destitute ones among them have been temporarily provided for by the citizens and they seem to be satisfied.

The extra policemen have been discharged. Serious trouble was feared yesterday, and citizens and police were armed to prevent it. The disturbances grew out of the failure of Tennant & Johnson, contractors for the West Virginia Railroad Company. The failure threw out of employment several hundred Irish laborers, who were also defrauded of a month's wages. The ignorant foreigners could not be made to understand the reasons for the failure, and being deprived of hard earned money and made threatening demonstrations.

Upon the railroad company's promise to assume the debt, on Wednesday, the men, who were in a desperate mood, retired to their camp, but they came out again yesterday by hundreds, and congregating in the Court House square, demanded immediate payment.

They were dispersed by armed citizens, but returned last night and threatened to burn and plunder the town. The people here had been so badly frightened by the riotous demonstrations that they were unable to do anything but stand on their defense.

Notwithstanding the trouble Morgantown is full of gaiety, and the teachers' institute is in session. About one hundred and twenty-five teachers and many visitors are in attendance. To-night the ladies are holding a brilliant lawn fete on the Academy campus.

ANOTHER BOODLE GANG

Unearthed in Chicago—Alleged to be the Give Street Car Frauds.

CHICAGO, August 19.—The announcement this morning that Henry Sheridan is mysteriously missing is believed to be the first of a series of sensational denunciations in connection with a coming whole-sale prosecution of bribe-taking members of the Chicago Board of Aldermen. Sheridan was the private secretary and confidential man of Dwight K. Tripp, ex-Governor of the Chicago Board of Aldermen, and a member of the Chicago Board of Aldermen.

Many Irish papers appeared with black borders this evening. The announcement of the proclamation was received quietly in Ireland. At Limerick twenty-five men were arrested. Many liberal members of the House of Commons have also joined.

Surprised at Chamberlain's Attitude. LONDON, August 19.—The Standard to-day applauds the Government's firmness in the matter of the Land bill and is surprised at Mr. Chamberlain's attitude. The Standard says that the Government's policy is to make an empty chest stand up stiff and straight as to support the Government's chameleon-like policy. A plunge on both sides, is the verdict of the English and Scotch press.

Chamberlain has Withdrawn. LONDON, August 19.—Mr. Chamberlain and Mr. W. P. Russell have withdrawn from the Unionist Party in consequence of the proclamation of the Irish National League by the Government.

Emperor William III.

BERLIN, August 19.—Emperor William is so ill that it has been arranged that the King of Saxony shall represent him at the Kensington maneuvers. Official circles say the Emperor caught cold during the sudden change in the weather and that the chief symptoms of his indisposition are occasional rheumatism.

The Klippe to Germany.

BERLIN, August 19.—There was a eclipse of the sun to-day. The sky was entirely overcast and the sun was invisible. The eclipse was preceded by the appearance of deeply colored clouds.

Not Certain of Stanley's Death.

ZANZIBAR, August 19.—Well informed people here regard as baseless the report that Henry M. Stanley has been murdered after having been deserted by his escort.

WHERE IS THE MONEY?

Inquiring for the \$100,000 that Scott Stoddard from the Manhattan Bank.

NEW YORK, August 19.—In the problem of the robbery of the Manhattan Bank in June of 1885, says the Herald, there really remains but one unknown quantity. Teller Scott, who fled the city, is in England. Lawyer Dunn, who promised to save the people for the money, is in London. The money is in the hands of the robber, who is in London. The money is in the hands of the robber, who is in London.

The Curious Result of Internecine Warfare Between Two Families. NEW YORK, August 19.—A rare and curious mixture by marriage and intermarriage between two well known families of New York, says the Herald, has resulted in a curious mixture of blood.

Her dimensions were 400 feet long, 40 feet beam, and 4,000 tons burden. Upon the present disastrous trip she was acting as a substitute for the City of Berlin, and was under way to New York. The vessel was taken from the manifest at the general office of the company; 2,031 bales of cotton, 5,011 boxes of cheese, 1,098 boxes of bacon, 576 boxes of canned goods, 1,580 barrels of flour, 1,580 barrels of sugar, 1,580 barrels of coffee, 1,580 barrels of tea, 1,580 barrels of rice, 1,580 barrels of wheat, 1,580 barrels of corn, 1,580 barrels of oats, 1,580 barrels of barley, 1,580 barrels of rye, 1,580 barrels of buckwheat, 1,580 barrels of flax, 1,580 barrels of hemp, 1,580 barrels of jute, 1,580 barrels of cotton, 1,580 barrels of wool, 1,580 barrels of silk, 1,580 barrels of linen, 1,580 barrels of paper, 1,580 barrels of cloth, 1,580 barrels of leather, 1,580 barrels of rubber, 1,580 barrels of glass, 1,580 barrels of pottery, 1,580 barrels of china, 1,580 barrels of iron, 1,580 barrels of steel, 1,580 barrels of copper, 1,580 barrels of brass, 1,580 barrels of zinc, 1,580 barrels of tin, 1,580 barrels of lead, 1,580 barrels of silver, 1,580 barrels of gold, 1,580 barrels of platinum, 1,580 barrels of palladium, 1,580 barrels of rhodium, 1,580 barrels of iridium, 1,580 barrels of osmium, 1,580 barrels of selenium, 1,580 barrels of tellurium, 1,580 barrels of arsenic, 1,580 barrels of antimony, 1,580 barrels of bismuth, 1,580 barrels of mercury, 1,580 barrels of cadmium, 1,580 barrels of cobalt, 1,580 barrels of nickel, 1,580 barrels of manganese, 1,580 barrels of chromium, 1,580 barrels of vanadium, 1,580 barrels of niobium, 1,580 barrels of tantalum, 1,580 barrels of molybdenum, 1,580 barrels of tungsten, 1,580 barrels of uranium, 1,580 barrels of thorium, 1,580 barrels of radium, 1,580 barrels of polonium, 1,580 barrels of astatine, 1,580 barrels of francium, 1,580 barrels of actinium, 1,580 barrels of protactinium, 1,580 barrels of mesactinium, 1,580 barrels of thallium, 1,580 barrels of lead, 1,580 barrels of bismuth, 1,580 barrels of antimony, 1,580 barrels of arsenic, 1,580 barrels of selenium, 1,580 barrels of tellurium, 1,580 barrels of arsenic, 1,580 barrels of antimony, 1,580 barrels of bismuth, 1,580 barrels of mercury, 1,580 barrels of cadmium, 1,580 barrels of cobalt, 1,580 barrels of nickel, 1,580 barrels of manganese, 1,580 barrels of chromium, 1,580 barrels of vanadium, 1,580 barrels of niobium, 1,580 barrels of tantalum, 1,580 barrels of molybdenum, 1,580 barrels of tungsten, 1,580 barrels of uranium, 1,580 barrels of thorium, 1,580 barrels of radium, 1,580 barrels of polonium, 1,580 barrels of astatine, 1,580 barrels of francium, 1,580 barrels of actinium, 1,580 barrels of protactinium, 1,580 barrels of mesactinium, 1,580 barrels of thallium, 1,580 barrels of lead, 1,580 barrels of bismuth, 1,580 barrels of antimony, 1,580 barrels of arsenic, 1,580 barrels of selenium, 1,580 barrels of tellurium, 1,580 barrels of arsenic, 1,580 barrels of antimony, 1,580 barrels of bismuth, 1,580 barrels of mercury, 1,580 barrels of cadmium, 1,580 barrels of cobalt, 1,580 barrels of nickel, 1,580 barrels of manganese, 1,580 barrels of chromium, 1,580 barrels of vanadium, 1,580 barrels of niobium, 1,580 barrels of tantalum, 1,580 barrels of molybdenum, 1,580 barrels of tungsten, 1,580 barrels of uranium, 1,580 barrels of thorium, 1,580 barrels of radium, 1,580 barrels of polonium, 1,580 barrels of astatine, 1,580 barrels of francium, 1,580 barrels
